

README

About the Project:

Notes App

Notes App is a web-based note-taking application built with C#, JavaScript, HTML, CSS, .NET Core, and SQL. It allows users to create, edit, delete, and organize notes efficiently.

Features:

Features

- ✓ *Create & Edit Notes – Write and save notes in real-time.*
- ✓ *Delete Notes – Remove unwanted notes permanently.*
- ✓ *Responsive Design – Works on desktop and mobile devices.*
- ✓ *SQL Database – Notes are stored securely in a database.*

Technologies Used:

Backend: C#, .NET Core

Frontend: HTML, CSS, JavaScript

Database: SQL (SQL Server / SQLite)

Framework: ASP.NET Core MVC

Prerequisites:

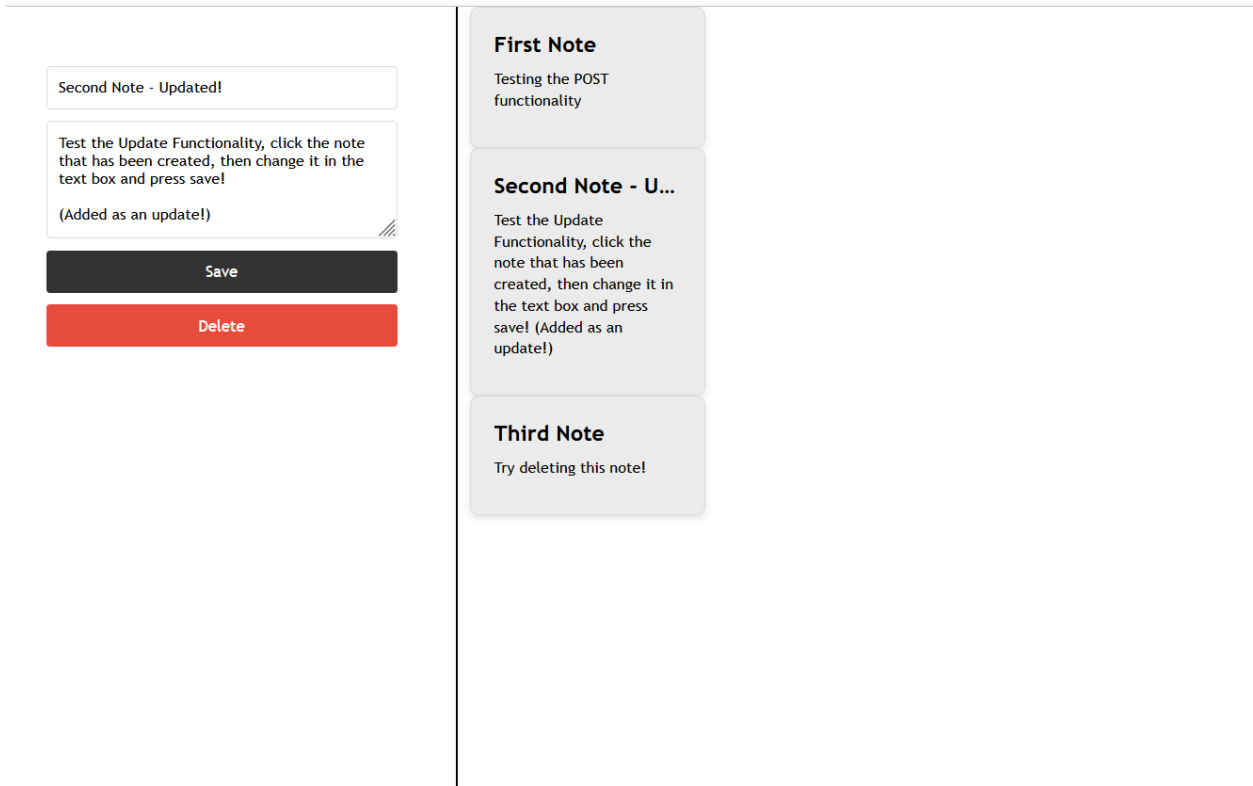

.NET Core SDK (v6.0 or later)

SQL Server (or SQLite for lightweight use)

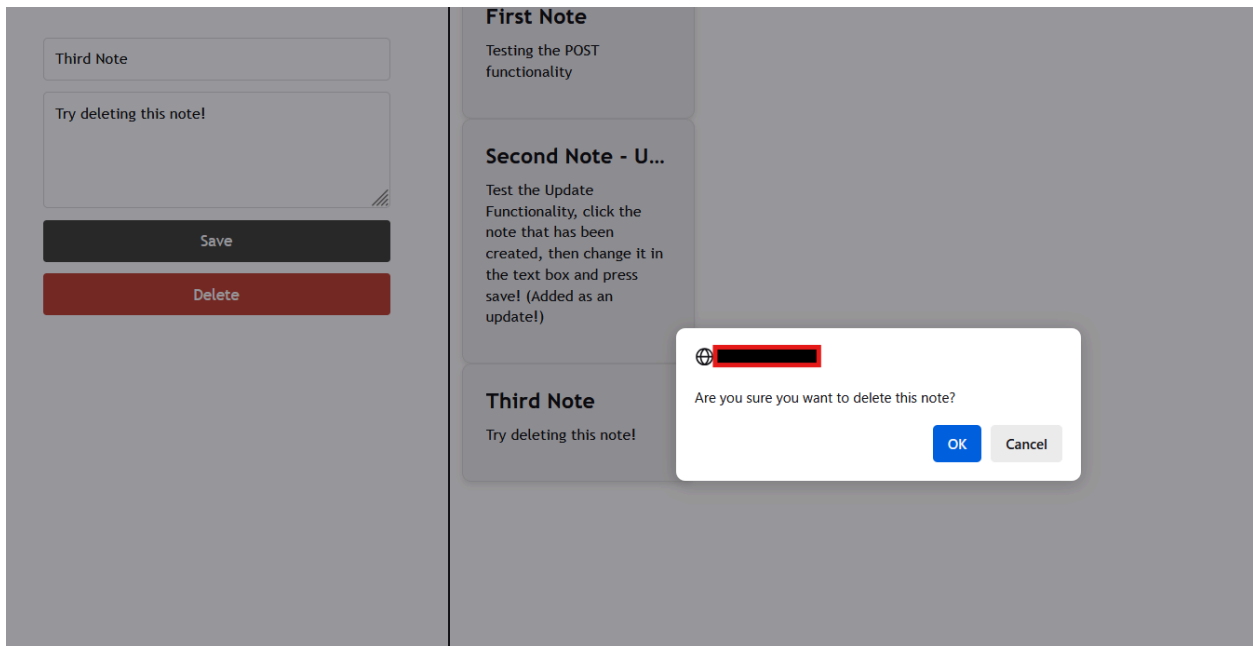

A code editor (e.g., VS Code or Visual Studio)
